## Applied Metamaterials

Call for papers

Themed Issue on  
*Terahertz metamaterials*

### Guest Editors

- (Lead editor) Dr Miguel Navarro-Cía, University of Birmingham, UK
- Prof Jiaguang Han, Tianjin University, China

## Background

Sandwiched between microwaves and optics, the frequency range between 0.1 and 10 THz promises a rich fund of new science as well as a myriad of applications. So far, the use of Terahertz radiation has been slow because the immature technology. This is the ideal playground for metamaterials. As a technology, metamaterials has demonstrated to be a very effective enabler. As a science, metamaterials has given rise to new physics.

## Aim and Scope of the Themed Issue

The aim of this Special Issue on ‘THz metamaterials’ is to provide a timely and high-quality collection of studies devoted to the science and engineering of metamaterials and metasurfaces at Terahertz frequencies. Hence, we invite researchers to contribute original research articles as well as review articles on this overarching topic.

## Submissions

All relevant papers will be carefully considered, vetted by a distinguished team of international experts, and published in accordance to the **Journal’s standard policies**. Full research papers and comprehensive review articles can be submitted online via the journal’s submission and peer review site.

## Submission deadline - 31st August 2018

Article submission and editorial system [here](#).

**EPJ AM**  
**Applied Metamaterials**

EPJ Applied Metamaterials is an open access platform for multidisciplinary researchers to exchange informations on metamaterials with a focus on high impact engineering applications.

# Editorial board

---

## Editor in Chief

---

**Yang Hao**, Queen Mary, University of London

## Associate Editors

---

**Andrea Alu**, University of Texas at Austin, USA

**Maria Kafesaki**, University of Crete, Greece

**Jensen Li**, University of Birmingham, UK

## Editorial Board

---

**Tahsin Akalin**, Institute of Electronic, Microelectronic and Nanotechnology (IEMN), DHS Dpt., Lille University, France, [website](#)

**Alastair Hibbins**, University of Exeter, UK

**Mikhail Lapine**, University of Sydney, Australia

**Christos Argyropoulos**, University of Nebraska-Lincoln, USA, [website](#)

**Stefano Maci**, University of Siena, Italy

**Pavel Belov**, ITMO, Russia

**Stefan Maier**, Imperial College London, UK

**Filiberto Bilotti**, University of Roma Tre, Italy

**Alessio Monti**, Niccolò Cusano University, Italy, [website](#)

**Alexandra Boltasseva**, Purdue University, USA

**Cheng-Wei Qiu**, National University of Singapore, Singapore

**Bernard Bonello**, Institute of Nanosciences of Paris, France

**Carsten Rockstuhl**, University of Jena, Germany

**Tiejun Cui**, Southeast University, China

**Ilya Shadrivov**, The Australian National University, Australia

**Yijun Feng**, Nanjing University, China

**Vincent Ginis**, Vrije Universiteit Brussel, Belgium, [website](#)

**Mario Silveirinha**, University of Coimbra, Portugal

**Anthony Grbic**, University of Michigan, USA

**Doug Werner**, Penn State University, USA

**Sebastien Guenneau**, CNRS, France

**Lei Zhou**, Fudan University, China

**Sailing He**, Zhejiang University, China

**Yongmin Liu**, Northeastern University, USA
