Call for papers

Themed Issue on
Terahertz metamaterials

Guest Editors

- (Lead editor) Dr Miguel Navarro-Cía, University of Birmingham, UK
- Prof Jiaguang Han, Tianjin University, China

Background

Sandwiched between microwaves and optics, the frequency range between 0.1 and 10 THz promises a rich fund of new science as well as a myriad of applications. So far, the use of Terahertz radiation has been slow because the immature technology. This is the ideal playground for metamaterials. As a technology, metamaterials has demonstrated to be a very effective enabler. As a science, metamaterials has given rise to new physics.

Aim and Scope of the Themed Issue

The aim of this Special Issue on ‘THz metamaterials’ is to provide a timely and high-quality collection of studies devoted to the science and engineering of metamaterials and metasurfaces at Terahertz frequencies. Hence, we invite researchers to contribute original research articles as well as review articles on this overarching topic.

Submissions

All relevant papers will be carefully considered, vetted by a distinguished team of international experts, and published in accordance to the **Journal’s standard policies**. Full research papers and comprehensive review articles can be submitted online via the journal’s submission and peer review site.

Submission deadline - 31st October 2018

Article submission and editorial system [here](#).

EPJ AM
Applied Metamaterials

EPJ Applied Metamaterials is an open access platform for multidisciplinary researchers to exchange informations on metamaterials with a focus on high impact engineering applications.

Editorial board

Editor in Chief

Yang Hao, Queen Mary, University of London

Associate Editors

Andrea Alu, University of Texas at Austin, USA

Maria Kafesaki, University of Crete, Greece

Jensen Li, University of Birmingham, UK

Editorial Board

Tahsin Akalin, Institute of Electronic, Microelectronic and Nanotechnology (IEMN), DHS Dpt., Lille University, France, [website](#)

Alastair Hibbins, University of Exeter, UK

Mikhail Lapine, University of Sydney, Australia

Christos Argyropoulos, University of Nebraska-Lincoln, USA, [website](#)

Stefano Maci, University of Siena, Italy

Pavel Belov, ITMO, Russia

Stefan Maier, Imperial College London, UK

Filiberto Bilotti, University of Roma Tre, Italy

Alessio Monti, Niccolò Cusano University, Italy, [website](#)

Alexandra Boltasseva, Purdue University, USA

Cheng-Wei Qiu, National University of Singapore, Singapore

Bernard Bonello, Institute of Nanosciences of Paris, France

Carsten Rockstuhl, University of Jena, Germany

Tiejun Cui, Southeast University, China

Ilya Shadrivov, The Australian National University, Australia

Yijun Feng, Nanjing University, China

Mario Silveirinha, University of Coimbra, Portugal

Vincent Ginis, Vrije Universiteit Brussel, Belgium, [website](#)

Anthony Grbic, University of Michigan, USA

Doug Werner, Penn State University, USA

Sebastien Guenneau, CNRS, France

Lei Zhou, Fudan University, China
Yongmin Liu, Northeastern University, USA

Sailing He, Zhejiang University, China
